

**P-16 COUNCIL VISION STATEMENT AND
KEY INDICATORS OF PROGRESS**

**P-16 Council
Agenda Item A
June 15, 2004**

Update

At its September 2002 meeting, the P-16 Council charged the staffs of its partner agencies to develop, in cooperation with local councils, a vision statement, a limited set of objectives derived from that vision, and a set of key indicators to measure progress toward achieving each of those objectives. This document is designed to focus the work of the P-16 Council and its partner agencies, strengthen its influence, unify the agenda of the state council and local councils, and increase accountability for achieving Kentucky's P-16 vision.

The staff has revised the document based on recommendations from the state and local P-16 councils and is developing specific performance indicators with targets as appropriate. A copy of the most recent draft will be available at the June 15 meeting. The staff will review the development of these performance indicators.
