Detail
First-time baccalaureate GRS cohorts at public universities (sector_code = 1), excluded_GRS <> 'Y', newcpekey not
Fall cohorts 20102 through 20212. Latest cohort with a closed window: 6-year 20192; 5-year 20202; 4-year 20212.
The graduation window for that cohort has not closed yet, so the count cannot be calculated.
Counts from 1 to 9 are redacted to protect student privacy. A rate is also redacted when its graduate count or the cohort count is redacted. A 0 is a true zero.
GRS.Fact_Cohort_Tracking earned_bacc_deg_4yr/5yr/6yr. Where a flag is N, a revised Type 5 (type5r) baccalaureate degree at the same institution sets it to Y: conferred by cohort year + 4 for the 4-year flag, and in exactly cohort year + 5 or + 6 for the 5- and 6-year flags.
Graduated 5 Years includes 4-year graduates; Graduated 6 Years includes 4- and 5-year graduates.
residency_code from the cohort table: A = In-state; B, C, D, E = Out-of-state; F, blank, or NULL =
low_income from the cohort table; NULL treated as not low income.
First_Gen from the cohort table; NULL treated as not first generation.
Is_STEMH from dbo.Fact_Enrollment for the cohort fall term, matched on cpekey = newcpekey, semester = cohort_year, and fice. NULL or no match treated as Non-STEM+H.
Age from the cohort table: 24 and under, 25 or older; missing reported as Unknown.
Graduated count divided by cohort count.
