

From Data to Decisions: Using Kentucky's Postsecondary Data Resources

Data can help boards move from asking what happened to understanding why it happened and what actions may be needed. Kentucky's postsecondary data resources provide information to help trustees and regents understand institutional performance, student success, workforce needs and opportunities for improvement.

Overview Video: Using Kentucky's Postsecondary Data Resources

CPE's overview video introduces Kentucky's postsecondary data resources and the types of data and analyses available to support board discussions and decision-making.

CPE Interactive Dashboards

Explore data built around the kinds of questions boards ask in their meetings. CPE's interactive dashboards include the annual Progress Report, Kentucky Overview and key performance indicators covering a range of student success and institutional performance metrics.

CPE Publications

CPE's online publication repository features studies and analyses that examine specific questions facing Kentucky's postsecondary institutions. Use these resources to explore issues your board may be wrestling with today, from student success and attainment to workforce needs and opportunities for improvement.

KYSTATS Dashboards

The Kentucky Center for Statistics (KYSTATS) collects and links education and workforce data to help policymakers, agencies and the public better understand outcomes across the Commonwealth. Its reports and dashboards provide insights into education and workforce efforts, including how students progress through education and into the workforce.

Futuriti Future Finder

Futuriti helps Kentucky students find their future by connecting their interests to real career pathways, the credentials and programs that lead there, and regional workforce demand and earnings. Boards can use this resource to better understand how academic programs connect to the workforce needs of their communities.

These resources offer a starting point for understanding Kentucky's postsecondary landscape and asking informed questions about your institution's performance, priorities and opportunities.
